Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in July, 2005 and WBCR (swimming) and SCR (fishing and wading) was observed in one of three sites evaluated. The stream met the maximum depth criterion at one site and both the average and maximum depth criteria at the other two sites. An interview indicated that through the spring and summer, people swim and wade in this stream an average of once to twice per week. Due to the observations, interview, and depth of the stream, the committee recommends retaining the WBCR designation.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
